“Zen Studios released *Planet Minigolf* on PlayStation Network back in 2010 and players are still enjoying that game today. The community has been very vocal over the years, sharing their ideas for a new game, and they gave us more than enough new ideas to come back and develop a minigolf game for this console generation,” said Tamas Balog, Head of Studio at Zen Studios. “The team has spent a lot of time developing better tools for players to make their own content – which was the number one request from players. If you enjoy minigolf as well as creating and sharing your own content, Infinite Minigolf was designed for you.”

Using the robust toolset contained in the course editor, players are the creators, and can showcase their creative abilities to players all over the world! Players will place course tiles and a vast assortment of gameplay objects into beautifully crafted environments as they create amazing minigolf courses.

Players can participate in 8-player online multiplayer matchups, local multiplayer matchups, and a variety of fun single player modes. Unlock a huge selection of cool minigolf gear, discover fun powerups that elevate minigolf gameplay to new levels of excitement.

The PlayStation 4 and Steam versions support PlayStation VR, Oculus Rift, and HTC Vive respectively, so players can experience the world of Infinite Minigolf in stunning VR, allowing environments to spring to life in exciting ways, making for the definitive VR golf experience. Build your creations and tour them in stunning VR!

Infinite Minigolf features incredibly accurate ball physics, in addition to dazzling graphics and detailed environments, each with a distinct visual theme and gameplay features.

Infinite Minigolf will be available on PlayStation 4, Xbox One, Steam, and Nintendo Switch this spring.
